

Offshore Systems' Sister Company Receives 2007 Military Training Technology Top 100 Award

**October, 2007
Vancouver, Canada**

Offshore Systems Ltd. is pleased to announce that its sister company, CHI Systems, the U.S. Systems Operations of OSI Geospatial has been recognized as a member of the Military Training Technology Top 100. Wayne Zachary, CHI Systems President and CEO comments "We are very proud to once again receive this important recognition of our contribution to the training and simulation market. This award reflects the talents of our team and our persistent focus on our customer's needs."

Innovative solutions include:

- Game based immersive training environments
- Low cost, anytime, anywhere access to training applications
- Synthetic or live role playing that enables team training with or without a live team
- Cognitive Systems Engineering to ensure optimal user experience
- Automated assessment and feedback
- Skills certification

Offshore Systems collaborates with CHI Systems in the international market. Training solutions span multiple domains including cultural awareness, communication styles, leadership, negotiation skills as well as pilot training, maritime applications, first responder healthcare training, IED detection and integration of manned / unmanned systems.

Modeling / simulation capabilities enable war fighters and first responders to 'train as they fight' with technology that can be used for operational as well as analytical applications.

- Small Unit Situation Awareness (SUSA) provides man portable GPS and GPS denied situation awareness and collaboration for homeland security and defense users.
- C3Core software framework offers a suite of tactical decision aids for terrain analysis, mobility analysis, weapons target pairing and automated sensor to shooter handoff.
- Tactical data collection and reporting for cultural data fusion and visualization.
- Common Operational Picture Product Line provides a standards based real time situation awareness visualization infrastructure.
- ECPINS is the recognized world leader in maritime navigation and blue force tracking.

About Offshore Systems Ltd.

Offshore Systems is a leading provider of marine electronics solutions. The company offers broad and versatile product lines including electronic chart systems for navigation and situational awareness, voyage data recorders and system components for bridge electronics. Over the years, defence and commercial customers have relied on Offshore Systems for its extensive experience and expertise in bridge and sensor integration with real-time display of electronic charts. As a result, the company has a worldwide customer base that has chosen their preferred products and services for innovative vessel navigation and bridge control solutions.

About OSI Geospatial

OSI Geospatial Inc. delivers advanced systems and software to address the growing need for enhanced situational awareness in command, control, communications and intelligence applications. By providing essential tactical and geospatial information, the company's systems and software help decision-makers know the precise location of mission operations across all military forces while integrating information with allies. OSI Geospatial systems are in use by military, government, and commercial customers around the world. The company is publicly traded on the Toronto Stock Exchange (OSI) and the Over the Counter Bulletin Board (OSIIF). For additional information please visit www.osigeospatial.com.

Forward-Looking Statements

Certain statements made in this news release that are not based on historical information are forward-looking statements which are made pursuant to the safe harbor provisions of Section 21E of the Securities Exchange Act of 1934 and Section 138.4(9) of the Ontario Securities Act. These forward-looking statements are subject to risks and uncertainties. Actual results may differ from these projections. The risks associated with the Company's business include risks related to its reliance on international government contracts; the number of large customer transactions and the related lengthy sales cycles in executing those opportunities; uncertainties associated with competitive bidding processes and contract negotiations; actions by government authorities; the effects of general economic and political conditions; changing foreign exchange rates; and challenges related to the company's ability to introduce, develop and implement new products and enhancements to existing products that respond to customer requirements in a changing, complex, technological market. A complete discussion of the company's risk factors is presented in the company's most recent annual reports, filed with the United States Securities and Exchange Commission ("SEC") and the Canadian Securities Administrators ("CSA"), as well as other periodic reports filed with the SEC and the CSA. The Company does not undertake any obligation to update the forward-looking statements.
